| RELEVANT EXPERIENCE

Tech Mahindra - UPS (Remote)

Level 1.5 Technical Support Associate

Plano, TX

2026-present

- Diagnose and resolve issues with plain-paper, label, and receipt printers, POS systems, pinpads, cash drawers, and related hardware, using connectivity, calibration, and configuration checks to quickly restore functionality.
- Support iPads and tablets across UPS operations, handling app failures, network problems, and device setup while accurately documenting cases and following UPS-specific secure handling procedures.
- Monitor Teams chat to identify agents needing support, approve and refine escalation requests, and act as the evaluation layer between Level 1 and Level 2 to ensure only fully worked, appropriate cases are sent to L2.

TEKSystems - Acrisure (Remote)

Service Desk Analyst

Detroit, MI

2023-2024

- Collaborated with IT teams to identify and resolve complex technical issues potentially related to malware, software vulnerabilities, or user errors.
- Maintained secure user environments by managing account access, enforcing IT standards, and supporting enterprise applications (Windows, Office 365).
- Delivered end-to-end support for global users, ensuring system stability, compliance, and proper documentation of incidents.

Commercial business website

Client Project

Sept 2026

- Custom, mobile-responsive web platform for a local business using HTML/CSS/JS, Python, Flask, and Unicorn for live Heroku hosting; built interactive gallery features, integrated Formspreet photo-upload APIs, and executed custom CSS refactoring for seamless cross-device performance.
